Technology News

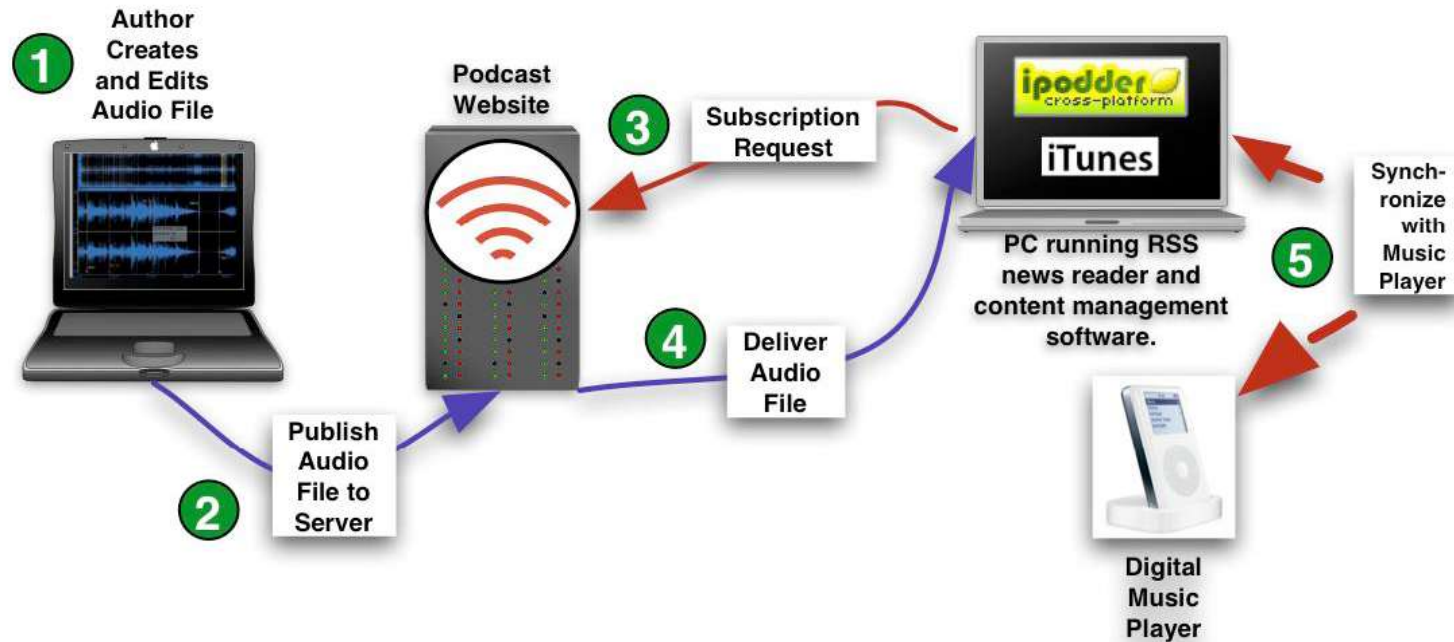

- In 2005, podcasting became one of the biggest news stories, with a dramatic surge in the number of people taking up the microphone and sharing their thoughts on the Internet..

What is a podcast?

- Podcasts are audio or video files distributed over the Internet via syndication, typically in the MP3 format.

How its Works

Podcasting publish and subscribe model.

MP3 and Digital Media Players for Podcasts

- Apple
- Create Technology
- SanDisk
- SamSung
- Coby
- Microsoft
- Archos
- Nextar

- RCA
- Sony
- Philips
- Toshiba
- iRiver
- Dell
- Transcend
- Much more ...

Research Question

- Is the achievement level, of students who listen to podcasts, greater than students who did not?

Variables

Traditional Learning
Methods:

1. Classroom learning
2. Attend class lectures

Podcast Lectures as a
Supplement Learning:

1. Classroom learning
2. Attend class lectures
3. Listen to podcast lectures outside of the classroom

Methods - Participants

- In a hypothetical scenarios, the participants were taken from a class size of 30 students in the normal class size who 15 students used podcasts assisted instruction and 15 students used the traditional methods and in class lectures. The demographics of the students assumed in both groups were very close with the technology enable group having access to the Internet and podcast lectures as a supplement to the presentation notes.

Methods - Design

- Students were pre-assessed after the first midterm evaluation of student performance and post-assessed at the end of the course in the final evaluation that examined the calculated grades in both groups.

Results

- The data calculated grades from the course objectives and learning outcomes, researchers would like to see some evident that podcasts as learning tools can motivate learning, reinforce learning, participate more fully in class, reduce the time searching through notes, and ultimately improve academic performance. Based on the previous literature reviews as described in this study, it seemed important to consider the influence of podcasts and the extra time on the learning activities, learning outcomes be been found to have influence on student academic achievement.

Discussion 1

1. How would you respond to someone who argues that access to podcasts might lead to students engaging less actively with the lecture material compared to traditional note-taking methods?

Discussion 2

Have you considered the possibility that students with podcasts may have different learning styles that could influence their overall understanding and retention of the information?

Discussion 3

What about the argument that the added distraction of digital media could negatively impact the focus and comprehension of students using podcasts during lectures?

Research Question

- Could the integration of podcasts significantly boost the second group's productivity and enhance their academic performance?
